The Rebel Phone: A safer smartphone for a smarter generation

Technology
designed from
the ground up.

Smartphones weren't built for kids.
So, we built one that is.

The Rebel Phone offers a real
smartphone experience with protection,
control, and independence built in.

Safety by Design

- No open internet browser.
- No social media access.
- No addictive algorithm loops.

Guided Independence

- Parental controls.
- +300 curated apps.
- A phone that grows with your child.

Freedom without Fear

- Calls, messaging, maps.
- Live GPS and geofencing.
- Age-appropriate independence.

Independence for them.
Confidence for you.

Connected. Not consumed.

More than a Phone. More than a Plan.

A new model for how
we can connect.

The Rebel Phone

A safer, smarter first
smartphone.
Built for healthy
digital habits.

The SIM-Pact

A flexible plan that
works for you and
gives back every
month.

The Community Model

A percentage of your
monthly account supports
education - directly,
consistently,
meaningfully.

Most phones are built
for adults. Rebel is built
to keep kids safe.

Most telecom
companies monetise
screentime. Rebel
prioritises wellbeing.

Most solutions react
after harm happens.
Rebel prevents it.

We're not restricting
childhood. We're
protecting it. And
reinvesting in the
world our children
will grow up in.
